## ISPC 2 HOURS FIRE PROTECTION COLLARS

### **Description**

Envirograf® ISPC pipe collars offer up to two hours fire protection and can be quickly fixed to the risk side of a room, using the supplied fixing clips. ISPC can be used in both new and retrofit applications to protect UPVC pipes ranging from 45mm to 250mm in size. Installers can easily fit the Envirograf ISPC product, even in those difficult to reach areas with no need for special tools or equipment.

### **Use:**

Where the opening in the wall has not been left big enough to allow a wrap to be fitted ISPC can be fitted over the service on both sides of the dry lining plaster board wall or on the risk side of a brick or block wall. This can also be on the risk side of a plasterboard ceiling.

### **Application**

- Place ISPC collar around pipe on risk side of room.
- Remove adhesive backing paper from fixing tab and fasten tab to position collar close around pipe.
- Make holes in wall and insert plugs
- Push metal clips over collar with equal spacing between clips
- Put screws through clips and fix.
