## Intumescent Pipe Covers

### DESCRIPTION

Envirograf® Intumescent Pipe Covers are designed to protect pipes and cables in close proximity to a ceiling or wall, or where they penetrate at awkward angles and prevent use of a regular Envirograf® wrap or pipe collar.

### APPLICATION

The intumescent pipe covers simply fit over the services and they are then fixed with screws. U-shaped pipe covers are available for open areas, and special h-shaped units are available for application in difficult corners.
