## Buildfix Multi-Purpose Flexible Building Adhesive

### Description:

Multi-purpose water based adhesive, for fixing timber, brick, card, ceramic, cork, glass, metal, plaster, certain plastics, polystyrene, etc. Low odour, solvent free, user friendly, ready to use, one component adhesive with high tack and fast curing properties.

### Special Features:

Adhesive will bond to most substrates to give a strong and flexible bond, reducing the need for screws and nails. Easy to use, ideal for areas where it is difficult to use other methods of fixing. Water-resistant when dry.

**Colour:** White

### Application:

Ensure all surfaces are clean, dry and sound. Apply to both surfaces in lines directly from the tube or spread the adhesive using a flexible application spatula. For porous surfaces simply spread and press the surfaces together. For non-porous surfaces; press together then pull apart and leave for 3 to 5 minutes then press together firmly. Wipe off excess using a damp sponge. Once dry will not be affected by water. Tools, hands and spills can be cleaned with warm water immediately after use.

### Typical Uses:

Can be used to fix skirting, coving, dado rails, battening, panels, architrave, cladding and plasterboard.

**COMPOSITION:** Water based polymer system with inert fillers.  
**SPECIFIC GRAVITY:** 1.40 to 1.43g/cm<sup>3</sup>  
**TACK FREE TIME:** 5 – 10 minutes, depending on thickness, room temperature and humidity.  
**FULL CURE:** Approximately 24 hours. Full bond strength after 48 hours.

### Storage:

Six to nine months in unopened original packaging  
Store between +5°C to +30°C  
Protect from frost

### Hazards:

None, Buildfix adhesive is a water based polymer adhesive. Take precautions as with other water based adhesives.
