AP074&74a-10-2014

Product Number: 74 & 74a

Acoustic, Draught, Smoke & Weather

Threshold Seals

Description:

Product 74: A 7mm deep x 12mm high x 2m long aluminium holder (ES/TB) in milled finish or painted white, brown or black (at extra cost). Standard brush sizes are 15mm, 25mm and 50mm (other sizes are available.) For sealing the bottom of doors, the back edge of sliding doors, between a door and wall, and down the centre stiles of double doors.

Product 74a: A white plastic self-coloured holder 2.1m long (ES/TB/P), fitted with a fixed brush seal 25mm or 40mm depth. An adjustable version is available which is a 2.1m long white plastic holder (ES/ATB) that permits three press-fit adjustments of the position of the brush seal, and the holder is supplied with either 25mm or 50mm brush depth. For sealing the bottom of doors, sliding doors and for use with products 106 and 107. Suitable for sealing over tiled floors and linoleum or vinyl floor coverings.

Application:

Product 74: Place the seal into position and fix with screws supplied. The holder can be painted but do not paint the brush seal.

Product 74a: ES/TB/P – Supplied with a fixed brush. Place seal into position and fix with pins supplied
ES/ATB – Supplied with separate brush. Simply pull the cord to free the brush then place in the plastic holder at the chosen position for the best seal - there are three press-fit positions to choose from. Place seal into position and fix with pins supplied.
