

Product Number: 116

### Protector for Etched or Stained Glass

#### **Description:**

A 2100mm long metal trim in standard finishes of brown or white (other colours available at extra cost). The protector is complete with pre-fixed intumescent seals.

#### **Application:**

Where decorative glass or plain glass windows require 30 minute or 60 minute fire protection, Envirograf® have developed a metal trim to surface mount onto the risk side of the partition or door to take Northern Wired Plain Clear – 6mm – 30 minute glass or Pilkington Clear Wired Glass for 60 minute protection and CGI Glass.

The section as shown below is easily installed. Intumescent A is already fitted to the Stained Glass Protector. Intumescent B needs to be fitted to the opposite side of the glass. Then the unit needs to be fitted as below.
