## Product Number: 117 Smoke Curtain

### **Description:**

The Envirograf® Smoke Curtain is an impregnated glass cloth, sealed with an intumescent coating that will withstand temperatures of up to 1200°C, providing smoke protection and BS476 Class 0 and Class1.

### **Use:**

For shopping malls, exhibition halls, factories, loft and suspended ceiling separation. A fire barrier smoke curtain for use where insulation is not an important criterion.

### **Application:**

The curtain is 1220mm wide and supplied by the linear metre up to 50 metre lengths. It is easily cut with a sharp knife or scissors. Adhesive is supplied so that a 25 to 30mm overlap can be made allowing the curtain to be made up to suit any area required. Please consult price list for fixing battens for fixing to concrete, steel and suspended ceilings and fixing clips for T-bars.
