

APPLICATION DATA SHEET

ENVIROGRAF®

AP138-02-2019

Product Number: 138

Envirogrip

Description:

A fire-resistant dry lining adhesive with acoustic properties for adhering plasterboard to all types of brick, block, concrete and timber. Can also be used for applying ceramic tiles to walls, brick block concrete, plasterboard, chipboard and wood-related products. Envirogrip can even be used in showers and damp areas.

Application:

Ensure that the surfaces are dry and free from both dust and grease. Apply straight from the tube or spread using a flexible spatula. Loose and crumbling areas should be primed or sprayed with water before filling to give a good key. Apply and leave for 3 minutes. Press board to wall or timber studding. Envirogrip allows for movement of board and can be pulled off and repositioned if required. Can be plastered after 2 hours.

Storage:

The shelf life of this product is 12 months in an unopened container. Store in cool, dry, ventilated conditions at ambient room temperature.

Do not store in direct sunlight.

Do not allow product to freeze.
