

APPLICATION DATA SHEET

ENVIROGRAF®

AP155-03-2015

Product Number: 155 Door and Cupboard Vent Grilles

Description:

Innovative door and cupboard vent by Envirograf®. This product assists in areas of airborne moisture, such as bathrooms, cupboards, kitchens, toilets etc. it offers up to one hour of fire protection to the penetration. Available in white or brown finish in standard sizes.

Use:

A simple yet effective ventilation system which provides a solution to poorly ventilated areas which rely on a single extractor fan due to not having a window present. This new vent can be utilised in various areas with high levels of steam and condensation such as hotel bathrooms, kitchen and utility rooms with washing machines and tumble dryers. More recently to comply with building regulations these vents can be inserted into under stair or service cupboards which house gas meters.

Application:

The vent grilles are simple to install. Three vents are required across the bottom of the door. Simply cut three holes to suit the vent diameter. Each grille comes in two parts which are then pushed together through the prepared hole with no need for any further fixings.

Standard sized grilles are made to suit door thicknesses from 35mm to 56mm but can also be made to suit thinner doors from 28mm to 45mm.
