

Product Number: 24

Cyanoacrylate Adhesive

Description:

A fast-curing adhesive, suitable for strong bonding of most materials. This glue can be used to bond metals, plastics, wood, etc. Some surfaces require cleaning with a special activation agent prior to application of the adhesive.

Material Specification:

| | |
|--|-------------------------------------|
| Consistency: | Liquid to gel viscosities. |
| Colour: | Clear to straw colour. |
| Odour: | Characteristic, Pungent. |
| Viscosity: | Various. (see Technical data Sheet) |
| Specific gravity @20°C: | 1.1gm/ml approx. |
| Relative vapour density: (air = 1) | 3 |
| Melting point. | °C: >-10 |
| Product flash point. (closed cup) | °C: 87oC |
| Product explosive limits: at 25°C (%vol in air) | Lower: N.A. Upper: N.A. |
| Autoignition temperature . | °C: N.A. |
| Product vapour pressure: (mmHg at 20oC) | 0.2-0.5mm Hg |
| Boiling point / Range | °C: >100 |
| Additional information: | None. |
