

Product Number: 91

BOARD FOR THE PROTECTION OF STEELWORK

Description:

Envirograf® STB/91 is a non-fibrous lightweight board available 6 mm thick and in a sheet size of 1000mm x 1200 mm. It can be cut easily with a sharp knife and it can be faced with decorative laminate or painted.

Use:

For fire protection of steelwork and metal ducting. Board is cut to size and adhered to the metal using Envirograf® Product 47 (FPA Board Sealant), which can also be used for filling the joints. There is virtually no waste as offcuts are adhered into the webs.

Performance:

Tested to BS476 Part 22 (1987) achieving an integrity and insulation of 104 minutes

Ordering references:

Available in white as standard but can be supplied with a decorative laminate facing at extra cost.
