

Product Number: 116

Protector for Etched or Stained Glass

Description:

A 2100mm long metal trim in standard finishes of brown or white (other colours available at extra cost). The protector is complete with pre-fixed intumescent seals.

Use:

The protector rail will hold clear Georgian wire glass, laminated glass or ceramic fire rated glass in front of the decorative glazed panel/s thereby giving 30 or 60 minutes protection depending on the rating of the fire glass used and leaving the decorative glazed panel undisturbed and fully protected.

Ordering references:

Supplied in 2100mm lengths. Can also be supplied in curved sections (e.g. arches). Contact technical department for further information.
