

### Product Number: 55

### FB/TS Cavity Barrier

#### **Description:**

FB/TS Cavity barrier for use vertically and horizontally. An impregnated fireproof sponge faced with intumescent. Red PVC covering and double sided tape on one side. Suitable for timber frame with brick/timber facing. FB/TS/TB suitable for timber frame with tile facing.

Sealed in a UPVC foil this cavity barrier offers optimum durability and moisture protection as well as a continued thermal insulation within the cavity section. In the event of a fire the intumescent seal will expand filling the cavity stopping the spread of fire and smoke.

#### **Use:**

FB/TS and FB/TS/TB can be fitted both vertically and horizontally in timber frames with brick/timber facing or tile facing to give protection to party walls and floors.

#### **Fitting:**

Simply peel off the self-adhesive tape backing and fix into position by pressing the barrier seal firmly into place.
