Product Number: 127 Double-Coated Silicone Fire Curtain

Description:

A double coated, flexible and waterproof silicone fire curtain for thermal protection against radiant heat, offering up to 100 minutes of fire protection.

Use:

Can be used as a drop curtain or roller curtain with an electric motor or as a fixed fire barrier curtain. Can be cut with scissors, can be overlapped by 25 – 50mm and joined with adhesive (not supplied). When fixing the curtain to steel, concrete or wood use FB/C1 metre long metal straps with fixing holes pre drilled 300mm apart.

Application:

An easy to install fire barrier curtain fixed with 25mm wide 20g zintec battens with fixing holes pre-drilled 300mm apart. Fixing by nails, screws, masonry nails. Individual pieces of cloth can be joined at their edges. Overlap join and adhere with SA1 adhesive, fold back as shown in the diagram below and secure with staples (not supplied) at intervals along the length of the join.

Staple at intervals through the joined curtain to secure
